### True Story:

NH man dies in construction accident as metal pierces his skull

The Associated Press  
Posted March 20, 2012, at 10:01 p.m.

- MANCHESTER, N.H. — Fire department officials say a 19-year-old construction worker has died after a rod from a metal bracket fell & embedded in his forehead in Manchester, N.H.
- Fire District Chief Jim Michael said someone yelled to warn Tyler Walsh. He looked up as the bracket fell from a window or ladder & pierced his skull over his right eye Monday. It was more than a foot long & a half-inch in diameter.
- WMUR-TV reports emergency crews needed to use a welder to shear the rod off so Walsh could be taken to a hospital. He did not regain consciousness & died Monday night.
- Walsh was working for his uncle's company doing framing at a home under construction. The bracket & rod belonged to a subcontractor working on the roof.

**Remember: It's important to always practice safety to prevent accidents like this!**
